PROFESSIONAL SUMMARY

B.Sc. Computer Science student who enjoys building things with code — I've put together 15+ small projects on my own time, ranging from Django web apps to Python/AI tools, and I run a small side business selling website templates. I completed a Django-based full stack internship through college and I'm now looking for an entry-level IT role where I can keep learning and contribute to real projects.

INTERNSHIP EXPERIENCE

Full Stack Development Intern (Django) — IHRD Skill Center, Mavelikara

- Learned full stack web development hands-on, using Django to build and deploy working web apps.
- Worked across the stack — backend logic, database integration, and frontend templates — on real project builds.

ENTREPRENEURIAL EXPERIENCE

Founder — Nexora Studio — Website Templates Business

- Started selling website templates on my own, beginning with an Art Portfolio template I'd originally built for a friend's business.
- Handle everything myself — design, pricing, and talking to customers over WhatsApp and email.

PROJECTS

Donor Hub *(Django, Python)*
Built this to connect blood donors with people who need them — handles donor registration and matches requests.
